🌟 Portfolio Summary

Welcome to my AI & Machine Learning portfolio. After a 25-year career in crude oil trading and risk control, I transitioned into the world of artificial intelligence to deepen my technical expertise and build real, end-to-end AI systems.

🚀 About Me

I'm focused on developing practical AI solutions using:

- Machine Learning
- Natural Language Processing
- Data Analytics
- Retrieval-Augmented Generation (RAG)
- Semantic Search
- Interactive AI applications

💼 Featured Projects

NewsBot 2.0 — AI News Intelligence System

End-to-end NLP system with classification, topic modeling, sentiment analysis, NER, summarization, semantic search, and a full Gradio interface.
Tech: Scikit-Learn, SpaCy, NLTK, Sentence-Transformers, Gradio

Study Buddy — RAG Learning Assistant

Retrieval-Augmented Generation tool that answers questions directly from study materials using embeddings and context-grounded responses.
Tech: Embeddings, Vector Stores, RAG Pipelines

Sentiment Analysis Pipeline

Complete ML workflow for text sentiment classification with model comparison and business-focused insights.
Tech: Scikit-Learn, NLTK, Pandas

🛠 Skills

- Machine Learning & NLP
- Embeddings & Semantic Search
- Data Cleaning & Feature Engineering
- Model Evaluation
- Python Development

🎯 Next Steps

Continuing to expand into LLM-powered applications, deepen my ML expertise, and build deployable AI tools.
